Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:

Step 2: Domain Choice
What domain did you choose to fine-tune the Meta Llama 2 7B model on?
Choices:
   1. Financial
   2. Healthcare
   3. IT
	1. Financial.

Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the **model_evaluation.ipynb file**?	The results for the short in the money options > are: In the money options are more likely to expire worthless and out of the money options are more likely to expire in the money. In the money options are more likely to be exercised and out of the money options are more likely to be exercised. In the money options are more ================================= =====

Step 4: Fine-Tuning Section	The results for the short in the money options
After fine-tuning the model, what was the response of the model to your domain-specific input in the **model_finetuning.ipynb file**?	> [{'generated_text': ' are shown in the following table.\nThe results for the long in the money options are shown in the following table.\nThe results for the short out of the money options are shown in the following table.\nThe results for the long out of the money options are shown in the following table.\nThe results for'}] ================================= =====
